Date: January 5, 2007

Mr. Dave Liagre  
U.S. Army Corps of Engineers  
Louisville District  
P.O. Box 59  
Attn: ORLOR-R/Ron Waller  
Louisville, KY 40201

Dear Mr. Liagre:

Summaries of the 1983-2006 gypsy moth trapping program conducted at four Army Corps of Engineers sites within the Louisville District are enclosed for your information (Table 1). Also enclosed are maps showing the trap locations at each site (Figures 1a-1d). The purpose of the trapping program is to monitor low-level gypsy moth populations and to help determine when more intensive survey methods should be employed.

Also enclosed are Figures 2a-2d which show the 2006 gypsy moth Slow-the-Spread (STS) trapping results in Ohio. The inserts on each Figure show close-ups of the STS results in relation to the four Corps site properties. For more information regarding the STS program, visit <http://www.gmsts.org>.

West Fork Lake trapped two male gypsy moths. Total trap catch at Clarence J Brown Dam decreased from 96 moths in 2005 to 28 moths in 2006. This decrease is most likely a result of the STS aerial treatments at and around CJ Brown Dam in the spring of 2006. Zero gypsy moths were trapped at Caesar Creek Lake and William Harsha Lake. Based on these results, gypsy moth populations will not impact the forest resources at these Corps sites in the immediate future.

It is important for Corps personnel to look for other gypsy moth life stages while performing their normal duties. Visit our GM web site located at <http://www.na.fs.fed.us/fhp/gm/index.shtml> for publications that are helpful in identifying the different gypsy moth life stages.

We would like to continue the trapping program at the same intensity in 2007. Thank you for your continued cooperation and if you have any questions regarding these results, please call Karen Felton at (304) 285-1556.

Sincerely,

A handwritten signature in dark ink, appearing to read 'D. Twardus', with a stylized flourish at the end.

DANIEL B. TWARDUS  
Acting Field Representative  
Morgantown Field Office
